

Levin Munyelele

munyelelelevin@gmail.com | 0748228565 | Nairobi, Kenya | github.com/Levinmunyelele

Summary

Frontend Developer & UX Enthusiast with 1+ years of experience building impactful digital health systems in Kenya. Skilled in Angular, Ionic, and Yii2 with a strong eye for user experience in low-resource, real-world environments. Passionate about designing intuitive, accessible platforms for healthcare and social impact.

Education

Kenyatta University, Sept 2018 - Dec 2022

Bachelor's degree in computer science

- **Key Courses:** Data Structures, Algorithms, Operating Systems, Database Management, Software Engineering, Compilers

ALX, May 2023 - Aug 2024

Data Science Certificate

- Training in data analysis, statistical modeling, machine learning, and data visualization.

Stanford University (Data Ocean Program), May 2025 – July 2025 (Expected)

Fundamentals of Data Science in Precision Medicine and Cloud Computing

- Focused on data science, genomics, and precision medicine

Technical Skills

Visual & Interaction Design:

- UI/UX Design Principles, Mobile-first & Offline-first Design
- Wireframing, Prototyping, Design Specifications, User Flow Mapping
- Visual Identity, Style Guides, Branding Alignment
- Figma (auto-layout, components, variants), Adobe Photoshop

Design Systems & Documentation:

- Design system creation and maintenance
- Component-based thinking, reusable UI libraries
- Design documentation, developer handoff, GitHub issue linking
- Experience supporting unified design across platforms (web/mobile/docs)

Programming & Development:

- Angular, Ionic, Node.js, PHP (Yii2), JavaScript, Python
- RESTful API development and integration
- Full-stack web and mobile app development
- Git-based workflows, GitHub/GitLab CI

Collaboration & Agile Delivery:

- Sprint planning, estimation, and issue tracking (Agile/Scrum)
- Cross-functional collaboration (services, product, engineering)
- GitHub for async design discussions, Slack for real-time collaboration
- Writing clear user stories, design specs, and definition-of-done

Data & Analytics:

- User feedback synthesis and usability testing (lightweight)
- Data visualization: Pandas, NumPy, Power BI, Matplotlib, Seaborn
- Experience analyzing real-world usage to improve interfaces

Cloud & Deployment:

- Firebase Hosting, basic AWS familiarity, Docker
- CI/CD pipelines, API deployment, Git versioning
- OpenMRS API integration (prior experience)

Professional Experience

Health Information Systems Intern

Health Strat Limited - September 2023-April 2025

Worked directly under the MESIS project with NASCOP/CDC and the University of Nairobi. Supported design,

development, testing, deployment, and end-user support for HIS applications

Key Projects & Contributions:

Qualipharm – Drug Inventory & Supply Chain Management System

- Spearheaded the development of **Qualipharm**, a health facility inventory management web application used to track drug stocks, supply needs, and reporting.
- Built a **responsive, user-friendly interface** using **Angular and Ionic**, ensuring seamless use across desktop and mobile.

- Developed **RESTful APIs** with **Yii2 PHP Framework**, connected to a **MySQL** backend, enabling real-time data capture and secure access.
- Conducted extensive **API testing using Postman**, validating endpoints for correctness, security, and performance.

Data Analysis on National HIV Dashboard

- Conducted data review and interpretation of metrics on the **National HIV Dashboard** to support performance tracking.
- Identified trends, gaps, and key indicators to inform health program decisions and reporting.

KenyaEMR Mobile Application

- Took lead on developing the **KenyaEMR mobile client**, enabling field health workers to access and update EMR records remotely.
- Integrated the app with **OpenMRS APIs** to fetch and synchronize patient data with the national health EMR system.
- Focused on creating an **intuitive UI/UX**, optimized for **low-bandwidth environments** and offline-first functionality.

KenyaEMR Web Application

- Contributed to the backend logic and front-end enhancements of the main **KenyaEMR platform**.
- Helped implement and test new **clinical concepts**, improve data workflows, and resolve critical bugs to enhance user experience and functionality.

Facial Recognition Authentication System

- Designed and built a **facial recognition-based login system** for secure authentication using **Google Vision APIs**.
- Implemented features like **camera capture**, **face detection**, and real-time user verification.

WhatsApp Chatbot Testing

- Participated in chatbot QA for improving HIV patient engagement tools

Web Developer Intern

Oracom Group — May 2022 – August 2022

Worked as part of a creative and technical team delivering digital solutions for clients in diverse industries.

My role spanned web development, content management, visual design, and data handling.

Key Responsibilities & Contribution

Website Development & Maintenance

- Built and customized client websites using WordPress, ensuring functionality, responsiveness, and aesthetic alignment with brand identity.
- Integrated essential plugins for contact forms, SEO optimization, security, and analytics.
- Participated in troubleshooting, testing, and updating websites for performance and compatibility across browsers and devices.

Graphic Design

- Designed posters, banners, and digital assets using Adobe Photoshop for both print and online marketing campaigns.
- Translated client ideas into visually compelling designs aligned with brand messaging.

Content & Data Management

- Carried out data entry and website content updates, ensuring accuracy and consistency across client platforms.
- Assisted in organizing and formatting content for use in web pages, blogs, and social media

. Team Collaboration

- Worked closely with designers and developers in a fast-paced environment to meet client deadlines.
- Gained experience in understanding client briefs, providing creative input, and supporting the delivery of professional digital products.

Graphic Designer

Kenyatta University — January 2018 – December 2022 | Nairobi, Kenya

Worked as a creative designer supporting various university departments, clubs, and events by producing high quality visual content for digital and print distribution.

Key Responsibilities & Contributions:

- Designed a wide range of **digital and print materials**, including posters, banners, flyers, event programs, and social media graphics, using **Adobe Photoshop** and related tools.
- Collaborated with event organizers, student groups, and university departments to **conceptualize and execute visual campaigns** that aligned with their goals and themes.
- Managed multiple design projects simultaneously, meeting tight deadlines while maintaining creativity and attention to detail.

Projects

Qualipharm

A drug inventory and supply chain management system used by healthcare programs.

- Built the front-end using Angular + Ionic and developed backend APIs using Yii2 with MySQL.
- Enabled facility-level drug tracking, request generation, and reporting.
- Designed intuitive user interface and ensured secure and efficient API communication with Postman.

KenyaEMR Mobile App

A mobile interface to access and update patient records linked to the OpenMRS system.

- Built using Angular + Ionic with REST integration to OpenMRS APIs.
- Optimized for offline use and low-bandwidth environments.
- Ensured seamless data sync and clean UI aligned with clinical workflows.

Face Recognition System

Developed a facial recognition-based user authentication system.

- Integrated Google Vision APIs to handle detection and user verification.
- Implemented camera capture, real-time face matching, and login security measures.

Certifications

• Data Science

Issued by: ALX

Date: Aug 2024

Description: Comprehensive training in data analysis, statistical modeling, machine learning, and data visualization.

• Digital Health: End-User Support (Helpdesk)

Issued by: eHealth Professionals Knowledge Network

Date: Aug 2024

Description: Expertise in providing effective end-user support for digital health tools, including troubleshooting and user training.

• Bachelor's Degree in Computer Science

Issued by: Kenyatta University

Date: July 2023

Description: Focus on core computer science areas such as data structures, algorithms, and software engineering.

• Enhancing eLearning Using AI

Issued by: National Research Fund & University of Nairobi (in partnership with Kenyatta University)

Date: July 8, 2021 – October 15, 2021

Description: Focus on applying AI in eLearning, utilizing Python for data science to analyze learning patterns, personalize materials, and improve engagement.
